Lancaster Municipal Gas (LMG) DOT Qualified Plumbers

Due to Federal Pipelines Safety Regulations any contractor/plumber who installs a customer owned portion of a gas service line must be "DOT Qualified" by the natural gas provider. In order to assist you with your search, LMG has provided a list of local plumbing companies below that meet these qualifications.* Lancaster Gas' "Code Book for Piping on Customer Premises" is available on the web at <http://www.ci.lancaster.oh.us/dept/gas/> and should answer most questions a plumber will have regarding replacing your service line. For re-establishment of gas service, your plumber must contact the gas department and must be on the job with the **pressure test(s) on and holding** when the gas department personnel arrive.

Locally approved plumbers include:

Company	Phone

*Lancaster Municipal Gas utilizes Veriforce to verify qualifications on all plumbers installing customer service lines. While it is not a requirement that a customer choose a plumber on the above list, it is required that the plumber's qualification information is registered with Veriforce.

The above list is provided strictly as a guide to assist in selection of a DOT operator qualified plumber. Any inclusion of a Plumber or Plumbing company on this list does not constitute endorsement or recommendation by Lancaster Municipal Gas. Inclusion on the list means the plumber's qualifications were current as of the revision date listed below. Current qualifications should be verified with the chosen plumber as they may have since expired.
